### Pinch Valve Sizes

10mm - 50mm available in Black or White POM

### Pinch Valve Sleeves

Natural Rubber, Natural Rubber Food Quality, EPDM, Nitrile.  
32mm - 50mm sleeves are interchangeable with existing V/VM/VMF/VF types  
10mm - 25mm require a slightly shorter sleeve than the other types,  
Please use 'K' as a reference, e.g. M010-03K

### Pinch Valve Optional Connections

Rubber hose, Stainless Steel pipe and internal BSP connections available.

The VMP Pinch Valve is also available as an ATEX approved Pinch Valve, using conductive POM.

Please see ATEX valves for more information

A major advantage is the fact that the VMP is shorter than the VM type, giving more flexibility with applications.

Improvements of the shape of the VMP valve along with the simple and clear instructions complete with photos allow the users of AKO Pinch Valves to complete re-sleeves in literally a couple of minutes. Only having to replace the sleeve means a fraction of the maintenance cost compared with other valves on the market.

Please see the datasheet below for complete fitting instructions for all sizes of the VMP valve.
