

High Performance Pinch Valves

Introducing the High Performance Pinch Valves Rated up to 40 BAR

{mosdocument=high performance valve.pdf}High Performance PV Datasheet{/mosdocument}

Pinch Valve Properties

Dimension: DN 25 - 1200mm
Installation Length: DIN, ASME, ISO
Media Pressure: 1 - 40bar
Open/Close Valves
Control Valves (electrical/electro pneumatical)
Stop Valves

Pinch Valve Design Features

Full Passage
Both Sides Leak Tight
Low Pressure Loss
No Accretion
Easy Maintenance
Integrated flange sealing

Branches of Industry

Paper and Pulp, Waste Water
Chemical Industry
Pigments and Fillers
Glass and Ceramics industry
Pneumatic conveying systems
Ash, Fly ash ...

Pinch Valve Advantages

No Plugging

Beginning incrustations are released by opening and closing from the wall of the sleeve and removed by the following medium.

Various installation lengths acc. DIN, ISO, ASME

Pinch Valve Sleeve Exchange

Sleeve can be changed easily by loosening the lower valve body

No special tools and no preparation of sealing surface required

Other specifications available on request, please contact AKO UK Ltd on 01327 312747 or email sales@ako-valves.com
